Matt,
Thanks.
John

Subject: Sunday AM update

Good morning John,

Recap from yesterday:

Irrigation ditches flushed in New Mexico

Navajo data - some info released yesterday on sample results - readings are trending downward - very little if any pre-event info to compare against versus info we had on the Animas - believe the Navajo will move toward opening everything up on Monday

Stat:

294 federal responders in the area

More 500 sediment, water and drinking water samples collected

More to come later.
